INFORMATION

Elphaba doll pattern is crocheted in continuous rounds, using US crochet terms.
I use x stitch
to crochet the doll. The size of the finished doll using recommended yarn and hook
is around 22 cm (with hat).

Please tag me @hobiliyumak and use hashtag #hobiliyumak when you share your finished toys using my pattern. So I can see and share your work.

For your questions and comments
You can send it to @hobiliyumak account.
Enjoy crocheting.
I will be glad to get any feedback from You!

INFORMATION

The choice of materials is crucial when making amigurumi and greatly influences the outcome.
Here are some commonly used amigurumi materials:

1. Amigurumi Yarn: A soft cotton yarn is preferred. It comes in different color options and thicknesses.

2. Crochet Hook: An appropriate-sized crochet hook is needed to make amigurumi. Different hook sizes can be used depending on the thickness of the yarn and the preferred amigurumi style.

3. Stuffing: Fiberfill stuffing material is used to fill the inside of the amigurumi. This determines the shape and plumpness of the amigurumi.

4. Safety Eyes or Noses: Used to add detail to amigurumi characters. These are usually made of plastic or other safety materials and should be chosen in the correct size.

5. Sewing Materials: Needle and matching thread are needed to sew together amigurumi pieces.

6. Accessories: Additional accessories like ribbons, buttons, or bows can be used for some amigurumi designs.

When using these materials, it's important to opt for quality and reliable brands, as the quality of the materials can have a significant impact on the appearance and durability of the amigurumi.

INFORMATION

There are some factors that affect the size and appearance of the doll.
These are;

1. The characteristics of the yarn used and the thickness of the crochet hook. Also, the amount of yarn used may vary according to the thickness of the crochet hook.

2. Whether your stitches shape is in the form of v stitches or x stitches affects the appearance of the doll and the amount of yarn used. It can make a difference especially in facial features.

3. Everyone has their own crochet tension. Depending on this crochet tension, there may be changes in the size of the doll and the amount of yarn used.

4. The colors and accessories used are also important in this regard. Even if they are not the same material, it would be good to choose similar materials, especially in terms of size. For example, button size and eye size.

MATERIALS & TOOLS

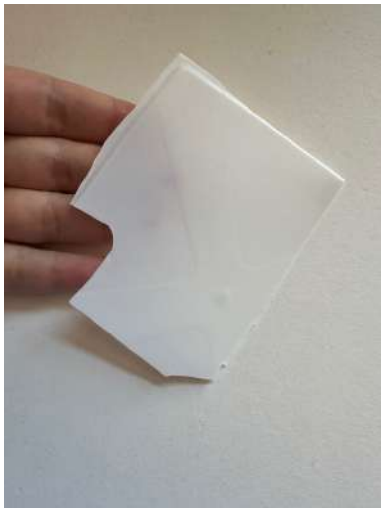
I use textile adhesive for attaching hair and some parts that are difficult to sew. The safety and healthiness of this method are not certain. Therefore, if you are making a toy that will be a collectible item, you can use it. However, if you are preparing toys for babies or children, sewing will be safer.

I use this cable with copper wire inside to make movable joints and neck support. If you don't use it, the toy's head won't stay upright. I usually use 2.5-3 mm thickness. If you use a thinner one, it won't provide adequate support. If you use a thicker one, you'll have trouble, especially when placing it inside the arm.



I use pieces cut from plastic containers, shaped according to the foot, for the soles. This makes the base flatter. Using this is not mandatory, but it helps achieve a flatter appearance.

ARMS

2 pieces

We crochet with green yarn.

1. 6sc in MR (6)
2. (sc, inc)*3 (9)
3. 9sc (9)
4. w, 8sc (11)
5. m, 8sc (9)

6-21. 9sc (9), 16 rounds, fasten off.

Crochet the other arm in the same way.

Don’t stuff the arms. Tape the end of the 11 cm copper wire (This size may vary depending on the size of your doll.) and insert it into the arm.

LEGS

Attach green yarn.
14. Blo 14sc (14)
15-22. 14sc (14), 8 rounds

On the 14th row, attach black yarn to the remaining loop (Flo) 14sc, sl st , fasten off.

Up to this point, crochet both legs the same way. The numbers after this can vary depending on your hand gauge, yarn thickness, and crochet style. The crucial point is to adjust the last stitch so that it falls exactly in the middle of the legs' side.

1st leg:
23. 11sc, fasten of.

2nd leg
23. 14sc
24. 5sc , attach black yarn.

BROOM

Broomstick

Cut a piece of floral wire according to the height of your doll (I cut 19 cm). Wrap brown yarn around this wire using glue (I used double-sided tape instead of glue).

Then, attach the piece you crocheted for the broom's bristles using glue (make sure to secure it slightly above the very tip of the wrapped wire, not right at the end). At this stage, I sewed the outermost layer and glued the inner layers. Finally, attach the brown piece to the top of the broom's bristles.
